Abstracts

Off Highway Tires are most commonly employed in vehicles used in off the road applications such as construction, mining and industrial sectors. They are popular alternative of the conventional on road tires for the vehicles which are generally used in terrains with uneven topography.

Scope of the Report:

This report focuses on the Off-highway Tire in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Advancing technologies will create opportunities for the off highway tire manufacturers to augment their product offerings and meet the increasing customer demand. Moreover, new compounds, integrated value-added technologies such as tire pressure monitoring systems (TPMS) would help the manufacturers to manufacture more durable, efficient and long lasting tires.

Manufacturers are constantly focusing on improving tire attributes, such as cut resistance, load puncture and durability.

The worldwide market for Off-highway Tire is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.

Market Segment by Manufacturers, this report covers
