## Abstracts

The global Off Price Retail market size is expected to reach \$ 5079340 million by 2029, rising at a market growth of 7.5% CAGR during the forecast period (2023-2029).

Global key players of off price retail include COSTCO, Shoprite Holdings, Pick n Pay and PEP Africa. The top four players hold a share about 21%. In terms of product, retail apparel and footwear is the largest segment, with a share about 47%. And in terms of sales channel, the largest channel is offline sales, with a share about 96%.

Off-price is a trading format based on discount pricing. Off-price retailers are independent of manufacturers and buy large volumes of branded goods directly from them. The off-price retail model relies on the purchase of over-produced, or excess, branded goods at a lower price, thus being able to sell to consumers at a discount compared to other stores which purchased an initial run. The model is more common in countries that import fashion-oriented or household goods, as the discount role in producer countries is usually filled by factory outlets or small-scale open-air marketplaces.

This report studies the global Off Price Retail demand, key companies, and key regions.
