According to our (Global Info Research) latest study, the global Off Road Fuels market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The off road fuels market is one of the most enticing fuel markets for the consumers to their vehicles. The off road fuels also known as dyed diesels are untaxed fuel primarily used for off road applications. The illegal use of off road fuels on on-road vehicles can led to heavy penalties and fines. The off road fuels are generally dyed in red color in order to differentiate it from highway fuel and on-road diesel.

Based on the geography, North America is expected to account for a major share in the forecast period. The commercial producers of renewable isobutanol for new product lines of off road fuels and marine application are likely to hold vital opportunities for the region over the forecast period. Europe followed by North America is anticipated to witness substantial growth in the use of dyed bio-diesel thus results to account for potential opportunities in off road fuel market during the forecast period.
