They not only display documents, presentations, and multimedia information, but also support real-time handwriting annotation, multi-person collaboration, video conferencing, content sharing, and remote conferencing. Office interactive intelligent panels are widely used in corporate conference rooms, training centers, innovation labs, and remote work environments, improving collaboration efficiency and communication experience. With the growing demand for digital office, hybrid office models, and enterprise collaboration, office interactive intelligent panels have become a crucial hardware foundation for the modern enterprise digital office ecosystem.

Office interactive intelligent panels use have become essential tools for digital transformation and efficient collaboration in modern enterprises, widely used in conference rooms, training centers, and remote work environments. In recent years, with the initial completion of educational informatization and the saturation of the

European and American markets, the global interactive tablet market experienced a short-term decline. However, with the popularization of hybrid working models and the growing demand for digitalization in enterprises, the commercial interactive tablet market is showing signs of recovery.

In the enterprise sector, the application scenarios of interactive tablets are continuously expanding, particularly in areas such as conferencing, training, and collaboration. With the continuous advancement of artificial intelligence technology, the integration of interactive tablets and AI is becoming a growing trend. For example, interactive tablets for conferences can implement intelligent framing, speaker tracking, and intelligent composition adjustment. Interactive tablets for education can use AI applications for facial recognition, automatic roll call before classes, and other teaching assistance. Furthermore, domestic companies are accelerating their overseas expansion efforts, actively exploring overseas markets and enhancing the international competitiveness of China's interactive tablet industry.
