According to our (Global Info Research) latest study, the global Offshore Photovoltaic Support System market size was valued at US\$ 2336 million in 2025 and is forecast to a readjusted size of US\$ 4518 million by 2032 with a CAGR of 9.9% during review period.

Offshore photovoltaic (PV) support systems are specialized structural systems used to support, fix, and hold PV modules and related electrical equipment in nearshore or offshore environments. They are designed to maintain long-term stable operation under complex marine conditions such as tides, waves, wind loads, and salt spray corrosion. These systems typically consist of support structures, foundations or floating bodies, connection and anchoring devices, and corrosion protection systems. They are critical infrastructure for the safe deployment, efficient power generation, and reliable operation and maintenance of offshore PV power plants.

The upstream of the offshore PV support system industry chain mainly includes raw material suppliers, such as high-strength steel, aluminum alloys, composite materials, anti-corrosion coatings, and fasteners, as well as providers of structural design software and engineering analysis tools. The midstream involves the design, manufacturing, and integration of support systems, with specialized support manufacturers handling structural design, strength analysis, anti-corrosion treatment, welding and assembly, and the integration of floating bodies or pile foundation systems. The downstream focuses on offshore PV power plant developers and operators, encompassing integrated offshore wind and solar applications, and extending to project installation, transportation, commissioning, and long-term operation and maintenance services, forming a complete industry chain ecosystem from material supply to system

application.

In 2025, the average price of offshore photovoltaic (PV) mounting systems is estimated at US\$2 million per megawatt, with sales reaching 1,135 megawatts. Production capacity is projected at 1,600 megawatts, and the gross profit margin is expected to be around 33%.
