Abstracts

The global Offshore Weather Services market size is expected to reach \$ 1833 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

Offshore Weather Services refer to professional meteorological, oceanographic, hydrological, and environmental risk services provided for offshore oil and gas platforms, offshore wind farms, marine engineering construction, maritime transportation, submarine cable laying, port operations, maritime rescue, fisheries, floating facilities, and scientific research operations. Services typically include monitoring wind, waves, swells, currents, visibility, thunderstorms, typhoons/hurricanes, sea ice, tides, sea surface temperature, air pressure, precipitation, sea state windows, operational feasibility, ship weather navigation, real-time warnings, long-term follow-up data, on-site meteorological observations, Metocean analysis, and 24/7 watch forecasts. Its core value lies in helping clients determine 'whether it is safe to set sail, whether lifting operations are possible, whether berthing is possible, whether maintenance is possible, whether cable laying is possible, and whether towing is possible,' thereby reducing the risks of downtime, accidents, fuel losses, delays, and asset losses.

Offshore oil and gas exploration, as well as the growing offshore wind energy sector, rely heavily on accurate weather forecasts to ensure the safety of personnel and equipment during operations. Shipping and maritime industries require reliable weather information for route planning, navigation, and ensuring the safety of vessels and crew members. Offshore weather services play a crucial role in monitoring and predicting environmental conditions, including sea state, currents, and storm systems, to assess potential risks and impacts. The rapid expansion of offshore wind power is one of the

most important growth drivers. Wind turbine installation, maintenance vessel scheduling, installation windows, submarine cable construction, and power forecasting all require sophisticated wind, wave, and current forecasts. Oil and gas platforms, on the other hand, continue to require extreme weather warnings, helicopter/vehicle scheduling, and emergency response support. Weathernews explicitly positions its maritime solutions as Shipping & Offshore Energy, emphasizing the reduction of weather risks and improvement of profitability through high-precision forecasts and offshore solutions.

This report studies the global Offshore Weather Services demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Offshore Weather Services, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Offshore Weather Services that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Offshore Weather Services total market, 2021-2032, (USD Million)

Global Offshore Weather Services total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Offshore Weather Services total market, key domestic companies, and share, (USD Million)

Global Offshore Weather Services revenue by player, revenue and market share 2021-2026, (USD Million)

Global Offshore Weather Services total market by Type, CAGR, 2021-2032, (USD Million)

Global Offshore Weather Services total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Offshore Weather Services market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include DTN, Weathernews Inc., Fugro, MetOcean Solutions, StormGeo, Spire Global, Sofar Ocean, Infoplaza, ConWX, Weather Routing Inc., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Offshore Weather Services market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
