## Abstracts

According to our (Global Info Research) latest study, the global Offshore Workover Rig market size was valued at USD 917.8 million in 2022 and is forecast to a readjusted size of USD 1244.9 million by 2029 with a CAGR of 4.5% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

In order to complete workover operations, workover rigs are needed. A workover rig mainly consists of lifting equipment (winches, derricks, etc.), loop flushing equipment (pumps and manifold systems, etc.), and rotating operation equipment (turntable, etc.). It is similar to an ordinary drilling rig. The operating load is relatively light, so the workover rig's power and other basic parameters, such as the volume, weight, and so on, are relatively smaller than the drilling rig. Though offshore workover rigs are similar to drilling rigs in composition, the installation is different at sea.

This report is a detailed and comprehensive analysis for global Offshore Workover Rig market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
