Abstracts

According to our (Global Info Research) latest study, the global Offsite Document Storage Service market size was valued at US$ 4248 million in 2025 and is forecast to a readjusted size of US$ 6064 million by 2032 with a CAGR of 5.3% during review period.

Offsite document storage service is a professional information management solution that means enterprises entrust inactive paper documents, archives, records or backup digital storage media to professional, high-security third-party facilities located outside the main office location for long-term storage and management.

The growth of the offsite document storage service market is primarily driven by businesses' rigid demand for business continuity and disaster recovery, increasingly stringent regulatory compliance requirements, the management challenges posed by explosive data growth, and the inherent drive to reduce local storage costs and improve operational efficiency. Faced with the risk of permanent local data loss due to natural disasters, cyberattacks, fires, or man-made accidents, businesses must store critical business documents, archives, and data backups in specialized off-site facilities that are physically isolated and equipped with high-level security and environmental controls to ensure rapid resumption of operations after emergencies. Furthermore, with the surge in the number of paper and digital archives held by businesses, local storage not only consumes expensive office space but also leads to management chaos and difficulty locating archives. Offsite storage services, by providing secure, compliant, and scalable professional hosting solutions, help businesses effectively mitigate risks, meet regulatory compliance, save costs, and achieve centralized and efficient archive management.

This report is a detailed and comprehensive analysis for global Offsite Document Storage Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Offsite Document Storage Service market size and forecasts, in consumption value ($ Million), 2021-2032

Global Offsite Document Storage Service market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global Offsite Document Storage Service market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global Offsite Document Storage Service market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Offsite Document Storage Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Offsite Document Storage Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Iron Mountain, Gilmore
