Abstracts

The global Offsite Records Management and Document Storage Services market size is expected to reach \$ 6568 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

Offsite records management and document storage involve physically moving physical records or digital data to a specialized third-party facility, which is physically separate from a business's primary location, to provide secure, cost-effective, and compliant management of business documents and data throughout their lifecycle.

The offsite records management and document storage service market has seen continuous growth in recent years, primarily driven by the rapid expansion of enterprise data and archives, stricter regulatory compliance requirements, and increased demand for digital transformation. Industries such as finance, healthcare, law, government, and manufacturing require long-term preservation of contracts, financial, human resources, audit, and operational records, leading to increasingly stringent requirements for secure storage, rapid retrieval, and long-term retention management. As data privacy protection, information security, and audit regulatory standards continue to improve, more and more companies are choosing to outsource document storage and record management to professional service providers to reduce operating costs and compliance risks. Rising office space costs and the increasing prevalence of hybrid work models are also driving demand for off-site archive hosting, digital scanning, and cloud-based record management. At the same time, increased awareness of disaster recovery and business continuity management has led to the rapid development of high-security warehouses, off-site disaster recovery, and long-term archive preservation services. The development of OCR recognition, AI-powered intelligent retrieval,

automated archiving, and digital management technologies is further propelling the industry towards intelligent, integrated, and data-driven upgrades.

This report studies the global Offsite Records Management and Document Storage Services demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Offsite Records Management and Document Storage Services, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Offsite Records Management and Document Storage Services that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Offsite Records Management and Document Storage Services total market, 2021-2032, (USD Million)

Global Offsite Records Management and Document Storage Services total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Offsite Records Management and Document Storage Services total market, key domestic companies, and share, (USD Million)

Global Offsite Records Management and Document Storage Services revenue by player, revenue and market share 2021-2026, (USD Million)
