Abstracts

The global Oil Film Automatic Bar Feeders market size is expected to reach \$ 277 million by 2032, rising at a market growth of 5.5% CAGR during the forecast period (2026-2032).

In 2025, global Oil Film Automatic Bar Feeder production reached approximately 13.06 K Units, with an average global market price of around 14268 USD per Unit.

An Oil Film Automatic Bar Feeder is an automated bar feeding device used together with CNC lathes, Swiss-type lathes, automatic lathes, turning centers, and turn-mill machines. Its core feature is the formation of an oil film or oil-bath support between the bar stock and the guide channel, guide tube, or guide bushing, allowing the rotating bar to be supported and guided by a stable liquid cushioning layer during high-speed machining and continuous feeding. The system typically integrates bar storage, automatic bar changeover, pusher feeding, oil circulation, guide support, vibration and noise reduction, remnant handling, machine-tool interface control, and safety protection.

The upstream raw materials for Oil Film Automatic Bar Feeder mainly include steel structural components, servo motors, hydraulic pumps, electrical controls, sensors, etc. Typical suppliers include ArcelorMittal, Nippon Steel, POSCO, Baowu Steel, Yaskawa, Mitsubishi, Siemens, Panasonic, Bosch Rexroth, Parker, Eaton, etc. The downstream applications are mainly in automotive parts, electronic connectors, medical devices, hydraulic and pneumatic components, aerospace parts, precision hardware, and general machinery manufacturing.

The single-line capacity of Oil Film Automatic Bar Feeder varies considerably depending on the complexity and customization of the product specifications, typically

ranging from 3,000 to 5,000 units per year. The industry's gross profit margin is in the range of 30% to 40%.

The core value of Oil Film Automatic Bar Feeders lies in their ability to solve the vibration, noise, friction, runout, and feeding instability problems commonly seen when long bar stock rotates at high speed. Compared with conventional guide-tube or mechanical-support bar feeders, the oil film structure provides smoother and more stable support for the bar during machining, thereby improving high-speed turning stability, enhancing surface finish, reducing spindle load, and minimizing dimensional fluctuation and tool wear caused by vibration. For Swiss-type lathes, small-diameter precision parts, long-duration continuous turning, and unattended night-shift machining, this product is not merely an automatic loading device, but a key process equipment that supports high-cycle, high-precision, and stable production.

From an industry development perspective, Oil Film Automatic Bar Feeders represent a mid- to high-end segment within the broader bar feeder market, with a relatively clear global competitive structure. European manufacturers have accumulated strong expertise in high-end long bar feeding, oil-film guiding, low-vibration control, and automation integration, with companies such as LNS, IEMCA, FMB, TOP Automazioni, and SAMSYS holding strong positions in the global mid- to high-end market. Japanese manufacturers place greater emphasis on compatibility with Swiss-type lathes, precision turning machines, and highly stable machining environments, with brands such as ALPS TOOL representing the oil-type feeder segment. In North America, demand is mainly supported by aerospace, medical, automotive, and precision machining industries, served by companies such as Lexair, Haas, and selected channel-oriented brands. Taiwanese manufacturers, including PRO Machinery, BARLOAD, and CHUNG PU, are competitive in oil film feeders due to their cost-performance balance and export capabilities, while mainland Chinese manufacturers are gradually penetrating the market through local machine-tool matching, manufacturing automation upgrades, and regional substitution. Overall, this is not simply a low-end machine-tool accessory market, but a specialized field shaped by premium brands, regional manufacturers, machine-tool OEM ecosystems, and automation integrators.

Future growth will be driven by the shift toward labor-saving manufacturing, rising demand for high-volume precision parts, wider adoption of Swiss-type lathes and turn-mill machines, increasing labor costs, and the growing need for unattended production. As new energy vehicles, medical devices, electronic connectors, hydraulic and pneumatic components, aerospace, and high-end equipment manufacturing continue to demand higher consistency, greater efficiency, and lower-vibration machining, the value

of Oil Film Automatic Bar Feeders will further evolve from an auxiliary feeding device into a key component of high-precision automated turning cells. Future products will place greater emphasis on servo control, rapid diameter changeover, oil condition monitoring, remote diagnostics, CNC communication, low-noise structure, and broader machine compatibility. Although the market is unlikely to experience short-term explosive growth, Oil Film Automatic Bar Feeders still offer solid upgrade potential and long-term market value as global manufacturing continues to pursue stable machining, continuous production, and leaner operations.

This report studies the global Oil Film Automatic Bar Feeders production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Oil Film Automatic Bar Feeders and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Oil Film Automatic Bar Feeders that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Oil Film Automatic Bar Feeders total production and demand, 2021-2032, (K Units)

Global Oil Film Automatic Bar Feeders total production value, 2021-2032, (USD Million)

Global Oil Film Automatic Bar Feeders production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Oil Film Automatic Bar Feeders consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Oil Film Automatic Bar Feeders domestic production, consumption, key domestic manufacturers and share

Global Oil Film Automatic Bar Feeders production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Oil Film Automatic Bar Feeders production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Oil Film Automatic Bar Feeders production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Oil Film Automatic Bar Feeders market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include LNS, Bucci Industries, Top

Automazioni, Alps Tool, PRO Machinery, Haas Automation, Barload Machine Co, FMB Maschinenbau, Samsys, Lexair, Inc., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Oil Film Automatic Bar Feeders market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global Oil Film Automatic Bar Feeders market?
2. What is the demand of the global Oil Film Automatic Bar Feeders market?
3. What is the year over year growth of the global Oil Film Automatic Bar Feeders market?
4. What is the production and production value of the global Oil Film Automatic Bar Feeders market?
5. Who are the key producers in the global Oil Film Automatic Bar Feeders market?
6. What are the growth factors driving the market demand?
