The global Oil-free Lecithin Granules market size is expected to reach \$ 1791 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

Deoiled lecithin granules are granular phospholipid products made from natural lecithin through deoiling, refining, and granulation processes. They are characterized by high phospholipid content, good flowability, easy measurement, and strong stability, and are widely used in the food, nutrition, and pharmaceutical industries.

Upstream applications mainly include soybean, egg yolk, and other oilseed raw materials and oil processing byproducts; downstream applications include food emulsifying ingredients, health foods and nutritional supplements, infant formula, pharmaceutical excipients, and some functional foods.

In 2025, the global hydrolyzed lecithin market price was \$5,830/ton, with annual sales of approximately 210,800 tons, a global annual production capacity of 250,000 tons, and an industry profit margin of 25%.
