Abstracts

The global Oil-Immersed Amorphous Planar Transformer market size is expected to reach \$ 490 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

In 2025, global production of oil-immersed amorphous planar transformers reached 29,096 units, with an average selling price of 12,000 USD per unit. Global annual production capacity of oil-immersed amorphous planar transformers is approximately 40,000 units, and the gross profit margin is about 26.2%. An oil-immersed amorphous planar transformer is an oil-immersed device that uses amorphous material as the transformer core, featuring high energy efficiency, low losses, and excellent performance, and is particularly suitable for distribution and transmission systems. The upstream of oil-immersed amorphous planar transformers includes amorphous alloy strips, conductors and winding materials, among others. The midstream consists of oil-immersed amorphous planar transformer manufacturers, while the downstream is mainly applied in rural power distribution, urban power distribution, and industrial and mining enterprises.

Currently, the global market for oil-immersed amorphous planar transformers is showing a steady growth trend. With the continuous improvement of energy efficiency requirements for power systems and the deepening promotion of energy-saving and emission-reduction policies in various countries, this product, with its significant advantages in low no-load losses, has attracted widespread attention in the renovation and new construction projects of distribution networks. Technological progress has gradually optimized manufacturing costs, and performance such as reliability and noise control has also been continuously improved, further broadening application fields. However, market development is still affected by factors such as initial investment

costs, stability of raw material supply, and user awareness. Overall, the industry outlook is positive, but sustained efforts are needed to reduce costs and improve product consistency.
