Abstracts

Crude oil, natural gas, and petroleum products are stored in large tanks or underground storage facilities. Valves are installed on the inlet and outlet lines of storage facilities for controlling the flow of hydrocarbons and to shut-off the lines as required. Based on storage type, the global oil and gas storage valves market is segmented into two types namely Aboveground storage, and Underground storage.

SCOPE OF THE REPORT:

This report focuses on the Oil and Gas Storage Valves in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Greenfield and brownfield refinery expansion is creating a potential market for the storage valves. The decline in the price of crude oil has benefitted the downstream industry. This will result in increased investments in the downstream sector of the oil and gas industry, which in turn, will boost the demand for storage tanks for the storage of crude oil, natural gas, petroleum products, and intermediates. This will consequently increase the demand for oil and gas storage valves market worth.

The worldwide market for Oil and Gas Storage Valves is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
