According to our (Global Info Research) latest study, the global Oilfield Multiphase Flow Meter market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Oilfield multiphase flow meter is a device used in the oil and gas industry to measure the flow rates of oil, gas, and water simultaneously as they are produced from a well. In traditional production operations, these fluids are typically separated at the surface using separators, and individual flow meters are used to measure each phase separately. However, in multiphase flow meters, all the phases are measured together without the need for separation.
