## Abstracts

The global Old House Renovation Service market size is expected to reach \$ 1302106 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

Old building renovation services refer to a comprehensive range of services that improve the spatial layout, facility systems, and overall quality of existing residential buildings or structures that have been built and used for a certain period of time through design optimization, structural repair, functional upgrades, and renovation. These services typically encompass building inspection and assessment, structural reinforcement, water and electricity system upgrades, interior and exterior decoration, energy-saving renovations, and smart home upgrades. They address safety hazards and outdated functions in older buildings while also meeting the demands for comfort, aesthetics, and modern lifestyles, making them an important component of the existing building stock market.

Against the backdrop of the global real estate market's shift from 'incremental development' to 'stock operation,' old building renovation services are experiencing sustained growth. On one hand, a large number of residences built in the last century are entering their renovation cycle, with aging infrastructure and incompatible spatial functions driving up renovation demand. On the other hand, energy conservation and emission reduction policies are prompting governments and homeowners to increase investment in renovations. Furthermore, the increasing demand from young families for higher quality living spaces, personalized design, and smart homes is also driving the renovation market's upgrade. In the future, with the development of urban renewal, an aging society, and green building trends, old building renovation services will evolve towards standardization, digital design (such as BIM), prefabricated construction, and

integrated solutions, and the industry has long-term potential for steady growth.

This report studies the global Old House Renovation Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Old House Renovation Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Old House Renovation Service that contribute to its increasing demand across many markets.
