Abstracts

According to our (Global Info Research) latest study, the global Old House Renovation Service market size was valued at US\$ 926427 million in 2025 and is forecast to a readjusted size of US\$ 1302106 million by 2032 with a CAGR of 5.0% during review period.

Old building renovation services refer to a comprehensive range of services that improve the spatial layout, facility systems, and overall quality of existing residential buildings or structures that have been built and used for a certain period of time through design optimization, structural repair, functional upgrades, and renovation. These services typically encompass building inspection and assessment, structural reinforcement, water and electricity system upgrades, interior and exterior decoration, energy-saving renovations, and smart home upgrades. They address safety hazards and outdated functions in older buildings while also meeting the demands for comfort, aesthetics, and modern lifestyles, making them an important component of the existing building stock market.

Against the backdrop of the global real estate market's shift from 'incremental development' to 'stock operation,' old building renovation services are experiencing sustained growth. On one hand, a large number of residences built in the last century are entering their renovation cycle, with aging infrastructure and incompatible spatial functions driving up renovation demand. On the other hand, energy conservation and emission reduction policies are prompting governments and homeowners to increase investment in renovations. Furthermore, the increasing demand from young families for higher quality living spaces, personalized design, and smart homes is also driving the renovation market's upgrade. In the future, with the development of urban renewal, an

aging society, and green building trends, old building renovation services will evolve towards standardization, digital design (such as BIM), prefabricated construction, and integrated solutions, and the industry has long-term potential for steady growth.

This report is a detailed and comprehensive analysis for global Old House Renovation Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Old House Renovation Service market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Old House Renovation Service market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Old House Renovation Service market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Old House Renovation Service market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Old House Renovation Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Old House Renovation Service market based on the following parameters - company overview, revenue, gross margin, product

portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Nitori, SKF Decor, Brick & Bolt, RENOVA, HR Construction Group, BGW Construction, Reborn Renovations, Repair Kochi, CHENNEE Renovation, Old Home Rescue, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.
