An OLED inkjet printing system is a specialized device used for the fabrication of OLED devices. It employs ink - jet printing technology to precisely deposit organic light - emitting materials (such as small - molecule organic materials or polymeric organic materials) onto a specific substrate (such as a glass substrate or a flexible plastic substrate) to form the light - emitting layer and other functional layers of the OLED, thus enabling the manufacturing of OLED devices. This system can achieve high - precision and high - resolution material deposition and is an advanced manufacturing equipment for display technology.
