OLED Stripping Solution is a specialty electronic chemical used to remove photoresist, polymer residues, organic contaminants, and process by-products generated during OLED display manufacturing. The solution is formulated with high-purity solvents and functional additives to achieve efficient stripping performance while minimizing damage to display layers and substrates. It is mainly applied in AMOLED, flexible OLED, micro OLED, and advanced display manufacturing processes. The product scope includes OLED-specific stripping chemicals while excluding general semiconductor stripping chemicals and industrial cleaning agents.

The industry chain includes upstream suppliers of electronic-grade solvents, organic compounds, additives, purification materials, and chemical raw materials. Midstream covers formulation development, purification, blending, filtration, quality testing, and packaging. Downstream applications include OLED panel manufacturing, display

module production, flexible display fabrication, and advanced electronic display technologies.
