Oligosaccharide syrup is a type of syrup made from the hydrolysis of starch, which breaks down the starch into shorter chains of sugar molecules known as oligosaccharides. Oligosaccharides are composed of two to ten sugar units and are considered prebiotic fibers that provide a number of health benefits. Oligosaccharide syrup is commonly used as a sweetener in various food products and beverages, as it is less sweet than regular sugar and has a lower glycemic index. It is also used as a functional ingredient in various food applications, such as a texturizer, thickener, or a binding agent.
