The ODT Omni-directional treadmill can make various actions such as 365-degree turning, walking, running and jumping. It is matched with the VR head display, which greatly improves and enhances the experience of virtual reality in actual use.

According to our (Global Info Research) latest study, the global Omni-directional Treadmill market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

One of the greatest VR accessories for a truly immersive VR experience with 360-degree movement is the VR omnidirectional treadmill (ODT). They're virtual reality walking and running platforms that let players move in different directions to explore the virtual environment, such as forward and backward, left and right, and diagonally. The VR treadmills employ inertial sensors to track your position, stride length, and speed before sending the information to a computer, which turns it into game actions. As a result, users may walk and run as if they were in the actual world in a virtual setting.
