## Abstracts

The global OMS Camera market size is expected to reach \$ 190 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

In 2025, global OMS camera production reached 2.5563 million units, with an average selling price of \$40 per unit. Global annual OMS camera production capacity is approximately 4 million units, with a gross profit margin of approximately 25.2%. OMS stands for Occupant Monitoring System. The OMS camera is the core component of this system, primarily responsible for real-time monitoring of passengers inside the vehicle. The upstream of the OMS camera industry chain includes image sensors and signal chains, optical components, and housing materials; the midstream consists of OMS camera manufacturers; and the downstream mainly comprises the commercial vehicle and passenger vehicle industries.

Currently, the OMS (Occupant Monitoring System) camera market is experiencing rapid growth. Key driving factors include increasing demands for automotive safety and intelligence, regulatory focus on child and occupant safety, and the application of big data and AI algorithms in scenarios such as behavior recognition, seat occupancy detection, and posture/sleep monitoring. Manufacturers are improving monitoring accuracy and privacy protection capabilities through high-resolution, low-power optical sensing, thermal imaging, and multimodal sensing (visual, infrared, depth) fusion. They are also increasing investment in in-vehicle system integration, edge computing, and data security to meet the demands for efficient, robust, and scalable commercial applications. As the market expands into high-end models and emerging markets, the application scenarios for OMS cameras will extend from simple seat occupancy detection to comprehensive solutions for fatigue, distraction monitoring, and safety alerts.

This report studies the global OMS Camera production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for OMS Camera and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
