The global On-Board Inert Gas Generating System market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

On-board inert gas generating system (IGGS) is a system installed on marine vessels to produce and supply inert gas, usually nitrogen, for various applications. The IGGS helps create an inert atmosphere within the cargo tanks, preventing the formation of flammable or explosive conditions, and reducing the risk of fire or explosion during transportation of flammable cargoes. It is commonly used in oil tankers, chemical tankers, and other vessels that transport hazardous or flammable materials.
