According to our (Global Info Research) latest study, the global On-Demand Mobility Services market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

On-Demand Mobility Services, and particularly ride-hailing, have emerged as a strong option for consumer urban transportation. In the process, ride-hailing has disrupted the taxi and limo industries and could next disrupt public transportation and last-mile goods delivery.?

On-demand mobility services is not a new concept. Car rental, as offered by companies like Hertz and Avis, taxi and limousine service, and public transportation provide early manifestations of both on-demand and scheduled mobility services. However, over the past 10 years we have seen new types of mobility services enter the market, as well as the re-imagination of several of the existing services. Zipcar reinterpreted car rental, Uber and Lyft reinterpreted taxi service, Via, and Chariot introduced new forms of ride-sharing, and automotive OEMs such as Daimler and GM introduced new car sharing models with Car2Go and Maven respectively. All these new services recognized the need to offer consumers improved convenience, better overall customer experience, and better pricing options without sacrificing safety.
