According to our (Global Info Research) latest study, the global ONC Certified EMR Software market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

In 2010, the Office of the National Coordinator for Health Information Technology (ONC) selected six organizations to test and certify electronic health records (EHR) software, which are also known as electronic medical records (EMR) software. Dubbed ONC-Authorized Testing and Certification Bodies, or ONC-ATCBs, these six companies determine which EHRs meet criteria to support 'meaningful use' (established by the Secretary of Health and Human Services).

An ONC-ATCB certified software assures users that the EHR software system comprises the technological capabilities, functionalities and security requirements that meet the criteria of meaningful use. The certification also ensures the provision of a compatible and structured format for patient data that can be retrieved from and transferred to other EHR systems.
