The global One-Touch Clamp market size is expected to reach $ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

A one-touch clamp is a type of tool-less clamp that can be easily engaged and disengaged by operating a lever. This design not only reduces the time required for clamping but also eliminates the need for tools such as wrenches, thereby improving productivity and workability.

Compared to automated hydraulic or pneumatic clamps, one-touch clamps significantly reduce production costs and the burden of daily maintenance, such as addressing oil leaks.

This report studies the global One-Touch Clamp production, demand, key manufacturers, and key regions.
