Onion peeling and stalking machine is a mechanical device specially used to remove the epidermis and root stalks of onions. The equipment uses specific mechanical devices or technologies, such as rotation, cutting, friction, etc., to quickly and efficiently remove the epidermis and root stalks of onions, thereby reducing the labor intensity of manual operation and improving production efficiency. Onion peeling and stalking machines are usually widely used in food processing, central kitchens, agricultural production and other fields, especially in occasions where a large number of onions need to be processed, its advantages are particularly obvious. By using an onion peeling and stalking machine, not only can the onion processing efficiency be improved, but also the integrity and cleanliness of the onion can be ensured, which provides convenience for subsequent processing or cooking. Onion peeling and stalking machines are widely used in starch factories, dehydrated vegetable factories, large canteens, clean vegetable processing, central kitchens, industrial and mining plants, vegetable distribution centers and other places. It has the characteristics of low breakage rate, sanitation and pollution-free, simple operation, low failure rate, and high production efficiency. It is an ideal onion-specific processing equipment. In addition, the automatic onion peeling and stalking machine can also be used in conjunction with other equipment such as onion shredders, onion ring cutters, onion cleaning machines, etc. to form a complete onion processing production line to meet the processing needs of different customers.

With the rapid development of the global and Chinese fruit and vegetable peeling equipment industry, the onion peeling and stalking machine market has also shown a steady growth trend. As one of the world's largest fruit and vegetable peeling equipment consumer markets, China's onion peeling and stalking machine market is expanding, and its growth rate is higher than the global level. In addition, with the advancement of science and technology and the changing needs of consumers, the onion peeling and stalking machine industry is facing opportunities for technological innovation and industry change. By introducing new technologies, new materials and new processes, improving the automation and intelligence level of equipment, reducing production costs, and improving product quality and processing efficiency have become important trends in the development of the industry. In summary, the onion peeling and stalking machine market has broad development space and opportunities.
