## Abstracts

According to our (Global Info Research) latest study, the global Online Car Auctions market size was valued at USD 15430 million in 2022 and is forecast to a readjusted size of USD 69280 million by 2029 with a CAGR of 23.9% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Online auctions are home to a wide range of vehicles for sale, and many of these models include damaged and light damaged cars. The exact nature of the damage in question can vary between technical, electronic or body damage, and can range from light to severe. Much of stock includes accident damaged cars that have been involved in road collisions or similar impacts. For the most lightly damaged cars, these accidents may only have affected the paint or bodywork, whereas more serious collisions could have lasting effects on the powertrain or underlying structure of the vehicle. A very small minority may include flood or fire damaged cars. While certain customers, such as first time buyers, might not find much use for these sorts of vehicles, damaged cars can be an invaluable source of spare parts for customers with more specialist mechanical experience. This type of vehicle can also encompass damaged repairable cars, which can be restored to full working condition.
