Online double conversion UPS is also called series adjustment UPS power supply. At present, most large-capacity UPS power supplies adopt this structural form. The UPS power supply is generally composed of several parts such as rectifier, charger, battery, inverter, etc. It is a power supply form mainly powered by inverter. When the mains power is supplied normally, the mains power charges the battery through the charger on the one hand, and is sent to the inverter after being converted into DC by the rectifier on the other hand, and then sent to the load after being converted into AC by the inverter. Only when the inverter fails, it is switched to the mains bypass power supply through the conversion switch.
