Abstracts

According to our (Global Info Research) latest study, the global Online Fraud Detection market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The online fraud detection (OFD) market is composed of vendors that provide products or services that help an organization detect fraud that occurs over the web, mobile or other telephony channels (i.e., call center, interactive voice recognition [IVR]) by performing one or both of these functions: Running background processes that are transparent to users. Corroborating a user's identity. OFD vendors detect online fraud as transactions and interactions occur, in real time or near-real time. They provide solutions for web, mobile or telephony channels. As the sophistication of attacks continues to evolve, so too have the tools, technologies and strategies that detect and prevent fraudulent activity.

The Global Info Research report includes an overview of the development of the Online Fraud Detection industry chain, the market status of Web (Cloud-based, On-premises), Mobile (Cloud-based, On-premises), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Online Fraud Detection.

Regionally, the report analyzes the Online Fraud Detection markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global Online Fraud Detection market, with robust domestic demand, supportive policies, and a strong manufacturing base.
