Online payment gateways are the merchant service which assists in carrying out a smooth transaction at the time of online shopping. The transaction is carried out by processing credit card, debit cards and direct payment process for various online business such as e- retailers, online websites. The payment gateways services can be provided by any financial service provider or by any commercialized bank. Online payment gateway enables transfer of information between front end processor, for instance, bank and payment portal such as website and mobile apps. The payment gateways ensure proper transaction with considering all aspect to facilitate the safe and secure transaction.

The average gross profit margin in this industry is around 50%.

Market Drivers

1. The Unstoppable Rise of E-commerce and M-commerce: The shift from physical to digital retail, accelerated by the pandemic, is the single biggest driver. The convenience of shopping online and on mobile devices continues to grow.
2. Proliferation of Subscription Business Models: The 'as-a-service' economy (SaaS, streaming, subscription boxes) demands robust, reliable recurring billing capabilities,

which gateways provide.

3. Growth of the Gig and Digital Economy: The expansion of freelancers, online marketplaces, and platform-based businesses creates a need for flexible payment solutions that can handle payouts to many individuals.

4. Consumer Demand for Frictionless Checkout: In the age of one-click ordering, consumers expect speed, convenience, and multiple payment options. Cart abandonment is a major cost, and advanced gateways help reduce it.

5. Globalization of Business: Even small businesses can now sell internationally. Gateways provide the necessary infrastructure to accept global currencies and local payment methods.
