Abstracts

The global Online Pet Care Software market size is expected to reach \$ 259 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

Online pet care software is a digital tool for pet professionals to manage client information, schedule services like grooming or sitting, process payments, and automate marketing.

The online pet care software market has seen continuous growth in recent years, primarily driven by the increasing global pet population, the trend of pets becoming family members, and the rising demand for digital pet ownership. More and more pet owners are prioritizing pet health management, vaccination and deworming reminders, online consultations, feeding records, and daily care, leading to a rapid increase in demand for digital pet management tools. The widespread adoption of mobile internet and the development of telemedicine have also driven the online transformation of pet consultations, appointments, grooming, boarding, and insurance services, increasing user frequency and platform stickiness. Meanwhile, younger pet owners are more inclined to use apps and smart devices for pet health monitoring, activity tracking, and data-driven management, promoting deep integration between smart collars, automatic feeders, and IoT devices and pet care software. The digital upgrades of pet hospitals, chain grooming salons, and pet service platforms are further promoting the rapid adoption of SaaS and cloud-based pet care management systems. The development of AI-powered consultation, health prediction, behavioral analysis, and personalized recommendation technologies continues to drive the upgrade of online pet care software towards intelligence, integration, and ecosystem platforms.

This report studies the global Online Pet Care Software demand, key companies, and

key regions.

This report is a detailed and comprehensive analysis of the world market for Online Pet Care Software, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Online Pet Care Software that contribute to its increasing demand across many markets.

Highlights and key features of the study
