Abstracts

The global Online Tutoring Service market size is expected to reach \$ 16601 million by 2032, rising at a market growth of 2.1% CAGR during the forecast period (2026-2032).

Online tutoring services refer to educational guidance and academic support services provided via the internet, designed to help students achieve better academic results and gain a deeper understanding of specific subject matter. These services typically take place through video calls, instant messaging, homework assistance, mock tests, and customized learning plans, covering all levels from elementary school to university and even career development. Tutoring services can provide personalized guidance to individual students or be conducted in small groups, supporting a wide range of subject areas, including mathematics, science, language arts, and programming. The flexibility, convenience, and broad range of content offered by online tutoring make it an increasingly important part of the modern education system.

With the rapid development of digital education and the transformation of global education models, the demand for online tutoring services continues to grow. Especially after the COVID-19 pandemic, many schools and institutions shifted learning online, further driving the development of the online education industry. It is expected that with technological advancements such as artificial intelligence and big data analytics, personalized learning will become the future trend of education, and tutoring services will become more precise and efficient. Furthermore, with the expansion of the global education market, especially in developing countries, more and more students and parents are choosing online tutoring services, driving the rapid growth of this industry.
