According to our (Global Info Research) latest study, the global Onshore Wind Power Anchor Bolt market size was valued at US\$ 3142 million in 2025 and is forecast to a readjusted size of US\$ 4726 million by 2032 with a CAGR of 6.0% during review period.

In 2025, global Onshore Wind Power Anchor Bolt production reached approximately 15.27 million units, with an average global market price of around US\$200 per unit.

An Onshore Wind Power Anchor Bolt is a critical structural fastening component used to connect wind turbine towers to reinforced concrete foundations in onshore wind farms. Its primary function is to transfer static loads, wind loads, vibration loads, and fatigue loads generated during turbine operation safely into the foundation structure, ensuring long-term operational stability. Onshore wind anchor bolts are typically manufactured from high-strength alloy steel and undergo heat treatment, anti-corrosion treatment, and precision machining to achieve high strength, excellent fatigue resistance, and long-term durability. As wind turbines continue to increase in capacity and tower height, anchor bolt systems are becoming larger and more demanding in terms of material properties, manufacturing precision, and installation reliability, making them indispensable components of modern wind power infrastructure.

The upstream segment of the onshore wind anchor bolt industry includes suppliers of alloy steel, steel bars, forgings, anti-corrosion coatings, and heat-treatment materials. Representative companies include Baowu Steel Group, Nippon Steel, ArcelorMittal, and Ovako. The midstream sector consists of manufacturers of wind power anchor bolts and foundation fastening systems, such as FineWork, Goodnail Fastener, and Reewind. Downstream customers mainly include wind turbine OEMs and wind farm construction

companies, including Vestas, Goldwind, Envision Energy, and Mingyang Smart Energy. Anchor bolt systems play a critical role in foundation integrity and long-term operational reliability of wind turbines.
