The global γ -aminobutyric acid (GABA) market size is expected to reach \$ 246 million by 2032, rising at a market growth of 7.9% CAGR during the forecast period (2026-2032).

γ -Aminobutyric acid (GABA) is a naturally occurring amino acid that functions as the primary inhibitory neurotransmitter in the central nervous system. Its main role is to reduce neuronal excitability by inhibiting nerve transmission, effectively calming nervous activity. This action is crucial for regulating various physiological and psychological processes, including mood, stress response, and sleep.

Global γ -aminobutyric acid (GABA) core manufacturers include Anhui Sinobiotek, Zhejiang Yiwan and Bloomage Biotech. The top three companies have a market share of about 35%. China is the world's largest market for γ -aminobutyric acid (GABA) with a market share of about 64%, followed by North America and Europe with a market share of 10% and 9%, respectively. In terms of product type, Microbial Fermentation (Food Grade) is the largest segment with approximately 82% market share. In terms of application, Food & Beverage is the largest downstream segment, accounting for approximately 59% of the market share.
