According to our (Global Info Research) latest study, the global Open Die Forging Machine market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

An open die forging machine, also known as a smith hammer or a flat-die forging machine, is a mechanical press used for forging metal. Unlike closed die forging machines, which use a set of dies to shape the metal, open die forging machines use flat dies that are not fully enclosed. This allows for more flexibility in the shapes and sizes of the parts that can be produced.
