Abstracts

The global Open Source Audit market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Open source audit refers to the practice of reviewing and analyzing the open source components used in software applications to identify potential security vulnerabilities, license compliance issues, and other risks. While there isn't a dedicated market specifically for open source audits, there are several companies and organizations that offer open source audit services or tools as part of their broader software security or compliance offerings.

This report studies the global Open Source Audit demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Open Source Audit, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Open Source Audit that contribute to its increasing demand across many markets.
