Abstracts

According to our (Global Info Research) latest study, the global Open-Type Fin Press Line market size was valued at US\$ 432 million in 2025 and is forecast to a readjusted size of US\$ 570 million by 2032 with a CAGR of 3.9% during review period.

Open-Type Fin Press Line is an automated fin stamping production line built around an open-frame press structure, used for coil unwinding, feeding, punching, forming, cutting, and stacking in heat exchanger fin manufacturing. Compared with closed-frame lines, its advantage lies in more open operating space, easier die access, faster specification changeover, smaller equipment footprint, more convenient maintenance, and stronger suitability for medium-speed, multi-specification, and cost-sensitive fin production. In 2025, production was 14,000 units and the average price was USD 30,000 per unit. The industry's capacity utilization rate in 2025 was about 65%, and the average gross margin was around 23%. Upstream, the key inputs include alloy steel, ball screws, servo motors, linear guides, and controllers, with representative suppliers such as Baowu Steel Group, THK, and Yaskawa Electric providing steel materials, precision transmission components, motion-control parts, and control systems. The midstream segment focuses on open-frame press structure design, progressive die matching, automatic unwinding and feeding control, punching and forming process integration, servo motion coordination, cutting and stacking mechanism assembly, line synchronization, precision calibration, safety protection, reliability testing, and final line commissioning, which together determine operating accessibility, forming accuracy, feeding stability, mold adaptability, automation level, maintenance efficiency, and cost competitiveness. Downstream, Open-Type Fin Press Line is mainly used in air-conditioning and refrigeration equipment as well as automotive heat exchanger production, where it supports fin manufacturing for evaporators, condensers, radiators,

and other heat exchange components, with representative customers including Midea Group, Gree Electric Appliances, and Denso.

Open-Type Fin Press Line demand will be shaped by manufacturers that value production flexibility, accessible operation, and lower equipment burden over maximum press rigidity. In air-conditioning and refrigeration equipment, it is suited to fin lines with varied specifications, moderate output requirements, and frequent mold adjustment. For automotive heat exchanger production, its role is more practical in prototype runs, auxiliary capacity, replacement lines, and mixed-model production where fast setup matters. As factories balance automation investment with operating cost, buyers will focus on open access, die change speed, feeding accuracy, maintenance convenience, controller stability, and acceptable forming consistency under flexible production.

This report is a detailed and comprehensive analysis for global Open-Type Fin Press Line market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Open-Type Fin Press Line market size and forecasts, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2021-2032

Global Open-Type Fin Press Line market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2021-2032

Global Open-Type Fin Press Line market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Units), and average selling prices (US\$/Unit), 2021-2032

Global Open-Type Fin Press Line market shares of main players, shipments in revenue (\$ Million), sales quantity (Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Open-Type Fin Press Line

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Open-Type Fin Press Line market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Burr OAK Tool (USA), SMAC Intelligent Technology (China), Hidaka Engineering (Japan), JDM Jingda Machine (China), Ningbo Jingsheng Automation Equipment (China), Ningbo Xin Chang Machinery (China), NTJF Intelligent Equipment (China), OMS Machinery (China), Satis Machinery (China), SINOAK Machinery (China), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Open-Type Fin Press Line market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Open-Type Fin Press Line Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 Capacity?500KN

1.3.3 500KN?Capacity?1000KN

1.3.4 Others

1.4 Market Analysis by Speed

1.4.1 Overview: Global Open-Type Fin Press Line Consumption Value by Speed: 2021 Versus 2025 Versus 2032

1.4.2 Speed
