Operating System (OS) Virtualization is also called OS-level virtualization is a type of virtualization technology which work on OS layer. As in cloud technology, virtualization plays an important role to make things easy and efficiently done, virtualization also need to be done at the OS level also. With the technique of virtualized OS, nothing is required to be pre-installed or permanently loaded on the local storage device. Everything runs from network using a virtual; simulation & that virtual disk is a disk-image (file) that remotely stored on a server i.e. Storage Area Network (SAN) or Non-Volatile Attached Storage (NAS).
