They are designed for one-time use and are disposed of after each surgical procedure to reduce the risk of contamination and cross-infection.

Key types of operating theatre disposable supplies include:

**Surgical Drapes and Gowns:** These are protective covers worn by surgical personnel and used to isolate the surgical site from the rest of the body and maintain a sterile field.

**Gloves:** Disposable gloves are worn by surgical and healthcare personnel to prevent contamination and protect against exposure to blood, bodily fluids, and pathogens during surgical procedures.

**Masks and Respirators:** Surgical masks and respirators are worn by healthcare professionals to protect against respiratory droplets and maintain a sterile surgical environment.

**Surgical Sponges and Towels:** Disposable sponges and towels are used for various tasks during surgery, such as cleaning, absorbing fluids, and maintaining a dry surgical field.

**Surgical Instruments:** Certain surgical instruments are designed for single-use and are disposed of after a single surgery to ensure sterility and prevent potential infections.

**Wound Dressings:** These include sterile dressings and adhesive bandages used to cover surgical incisions and wounds, aiding in the healing process and preventing infection.

**Catheters and Tubing:** Disposable catheters and tubing are used for various medical procedures, such as administering medications, draining fluids, or monitoring vital signs.

**Suction Tubes and Canisters:** Disposable suction tubes and canisters are used to remove excess fluids and secretions from the surgical site during procedures.

**Needles and Syringes:** Single-use needles and syringes are essential for administering medications, drawing blood, and various medical procedures.

**Sterile Swabs and Applicators:** Sterile swabs and applicators are used for wound cleaning, sample collection, and other medical purposes, ensuring a sterile environment.

**Waste Disposal Bags and Containers:** Disposable bags and containers are used to dispose of medical waste generated during surgical procedures in a safe and hygienic manner.
