According to our (Global Info Research) latest study, the global Optical Fiber Polishing Machines market size was valued at US\$ 48.01 million in 2025 and is forecast to a readjusted size of US\$ 75.89 million by 2032 with a CAGR of 6.8% during review period.

Optical Fiber Polishing Machines are a type of device specially used to polish (grind) various optical fiber products. For example, it can be used to polish (grind) the end face of optical fiber ceramic ferrule, such as optical fiber jumpers, pigtails, bundled optical fibers, PLC splitter heads, energy optical fibers, plastic optical fibers, pre-buried short ferrules of optical fiber devices, etc. It is widely used in the optical communication industry and is an irreplaceable equipment.

Optical fiber polishing machines can be divided into two categories: desktop, and portable (handheld). Among them, desktop products account for 89.5% of the global market share due to their high prices. In terms of sales volume, desktop products accounted for the highest proportion, accounting for about 76.6%.

The price range of this product is very wide, and the price of desktop products can range from 700 USD/unit to 30,000 USD/unit. High-end products usually have higher precision and accuracy, and are very intelligent. Low-end products require more manual processes, but have price advantages for the initial investment of small and medium-sized production companies. Portable products are mainly used for on-site operation of optical fibers, and the price range can range from 400 USD/unit to 3000 USD/unit.

According to our interviews, the competition in the mid- and low-end markets is very

intense and the market is close to saturation. The growth of high-end products is relatively optimistic.

Seikoh Giken, Domaille Engineering, ULTRA TEC Manufacturing, Beijing Grish and KrellTech etc. are the key producers in the global optical fiber polishing machines market. Top 5 took up about 66.2% of the global market in 2024. Seikoh Giken occupies the majority of the high-end market share. There are many manufacturers in the mid- and low-end markets.
