Abstracts

Analysts identify the growing number of product differentiations in OCT that lead to market expansion as one of the primary growth drivers for the global OCT market. Various optical coherence tomography (OCT) imaging technologies are increasingly used for ophthalmology applications such as for angiography, which will drive the demand for these devices in the coming years. Product differentiations such as SS-OCT imaging technology provides better, wider, deeper, and faster imaging of the retina and choroid due to the presence of integrated swept source (SS) technology in the device.

SCOPE OF THE REPORT:

This report focuses on the Optical Isolator in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Though optocouplers were used in the past four decades, the digital isolators are being increasingly preferred due to their various advantages such as less expensive, more reliable, and better power efficiency. The isolators provide better performance and accuracy and are increasingly preferred in industrial applications as they provide low-cost and efficient solutions for data transfer and equipment safety over optocouplers.

The worldwide market for Optical Isolator is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
