Abstracts

According to our (Global Info Research) latest study, the global Optical Liquid Detector market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The optical liquid detector can be used to check for any liquid. Unlike conventional cable testers no conductivity of the liquid must be provided. He has a digital output with end-of-line termination option in order to constantly monitor the wiring between the sensor and the monitoring system. The sensor can be directly connected to a VizioGuard (optionally via the digital input module to an ePowerSwitch Master). The power is supplied via the dry contact terminal.
