## Abstracts

The global Optical Microscope market size is expected to reach \$ 3276.1 million by 2029, rising at a market growth of 6.5% CAGR during the forecast period (2023-2029).

Global key manufacturers of optical microscope include ZEISS Group, Olympus (Evident), Nikon, Leica, Motic, etc. The top five players hold a share around 60%. The largest market is North America, with a share about 33%, followed by Asia-Pacific and Europe, both have a share about 32 percent.

The optical microscope, also referred to as a light microscope, is a type of microscope that commonly uses visible light and a system of lenses to generate magnified images of small objects. Optical microscopes are the oldest design of microscope and were possibly invented in their present compound form in the 17th century. Basic optical microscopes can be very simple, although many complex designs aim to improve resolution and sample contrast. Scanning electron microscopy and transmission electron microscopy and scanning probe microscopy will not be covered in this report.
