Abstracts

According to our (Global Info Research) latest study, the global Optoelectronic Device Package market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Optoelectronic or Photonics packaging requires extremely accurate placement of components to ensure appropriate suitable alignment and coupling of light into and out of devices. In many cases the generation or detection of light results in significant heat being generated, which if not suitably dissipated through appropriate joining technology and material selection, can adversely affect the device operation. Additionally, assembly processes can be complicated by the requirement that fluxes and other organic materials can't be used as they can degrade the performance of facets in optical devices.

The global market for semiconductor was estimated at US\$ 579 billion in the year 2022, is projected to US\$ 790 billion by 2029, growing at a CAGR of 6% during the forecast period. Although some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.76%, Sensor with 16.31%, and Logic with 14.46% growth, Memory declined with 12.64% year over year. The microprocessor (MPU) and microcontroller (MCU) segments will experience stagnant growth due to weak shipments and investment in notebooks, computers, and standard desktops. In the current market scenario, the growing popularity of IoT-based electronics is stimulating the need for powerful processors and controllers. Hybrid MPUs and MCUs provide real-time embedded processing and control for the topmost IoT-based applications, resulting in significant market growth. The Analog IC segment is expected to grow gradually, while demand from the networking and communications industries is limited. Few of the

emerging trends in the growing demand for Analog integrated circuits include signal conversion, automotive-specific Analog applications, and power management. They drive the growing demand for discrete power devices.
