Abstracts

The global Oracle EPM - Enterprise Performance Management Cloud Consulting Service market size is expected to reach \$ 16864 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

Oracle EPM Cloud consulting services refer to the professional technical and management consulting services provided around the Oracle Enterprise Performance Management Cloud suite (covering core modules such as consolidated financial statements, comprehensive budgeting, financial forecasting, profitability analysis, and tax governance). The core value lies in reshaping the enterprise's financial strategic loop through the cloud-native platform, assisting enterprises in making the transition from post-event accounting to pre-event prediction and in-process control. The upstream supply of this service mainly includes Oracle's SaaS software licensing, cloud infrastructure resources, and third-party advanced data integration tools; the midstream is mainly composed of service delivery entities such as global strategic system integrators, local professional financial consulting companies, and Oracle's own consulting department; the downstream directly connects with group enterprises worldwide that have strong demands for consolidated financial statements, cross-border tax compliance, and complex comprehensive budgets.

The Oracle EPM cloud consulting services are accelerating their progress towards an intelligent era centered on 'predictive AI finance' and 'real-time comprehensive compliance'. The future market trends mainly manifest as a transition from traditional manual budgeting consulting to rolling predictive consulting based on machine learning, seamless integration of environmental governance indicators and financial performance indicators, and comprehensive compliance governance of cross-border taxation under

the global minimum tax rate requirements. The core factors driving this market development mainly stem from enterprises' extreme demands for business agility and scenario simulation capabilities under the fluctuations of the global economic cycle, the international tax compliance legal penalties faced by multinational operations, the mandatory cloud-based transformation requirements of group enterprises for outdated and cumbersome local financial consolidation systems, and the high feasibility of cloud-native EPM in reducing overall operating costs.

This report studies the global Oracle EPM - Enterprise Performance Management Cloud Consulting Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Oracle EPM - Enterprise Performance Management Cloud Consulting Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Oracle EPM - Enterprise Performance Management Cloud Consulting Service that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Oracle EPM - Enterprise Performance Management Cloud Consulting Service total market, 2021-2032, (USD Million)
