Abstracts

An augmented reality game engine, or AR game engine, provides game developers with the framework for creating AR video game experiences. An AR game engine often contains an augmented reality SDK, which allows developers to design, build, and test their games. These tools enable developers to create and edit 3D characters that interact with the real world. With the help of these platforms, developers can assign behaviors to 3D objects and upload them for display in a camera view. AR game engines perform similar functionality to game engine software, but are unique in that they support AR operating systems and hardware either directly or through an API. AR game engines create games for devices that support augmented reality, such as mobile phones. While some AR game engines can also create augmented reality experiences, they should not be confused with virtual reality game engines, which allow developers to create augmented reality video game experiences that superimpose 3D objects into the real world.

According to our (Global Info Research) latest study, the global Augmented Reality (AR) Game Engine market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

This report is a detailed and comprehensive analysis for global Augmented Reality (AR) Game Engine market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company

profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:

Global Augmented Reality (AR) Game Engine market size and forecasts, in consumption value ($ Million), 2018-2029

Global Augmented Reality (AR) Game Engine market size and forecasts by region and country, in consumption value ($ Million), 2018-2029

Global Augmented Reality (AR) Game Engine market size and forecasts, by Type and by Application, in consumption value ($ Million), 2018-2029

Global Augmented Reality (AR) Game Engine market shares of main players, in revenue ($ Million), 2018-2023

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Augmented Reality (AR) Game Engine

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Augmented Reality (AR) Game Engine market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Unity Technologies, Epic Games, Apple, PTC and Foundry and etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.
