Oral hyaluronic acid is a dietary supplement form of hyaluronic acid, a naturally occurring compound found in the human body. Hyaluronic acid is a glycosaminoglycan, a type of carbohydrate molecule, that plays a crucial role in maintaining moisture, lubrication, and elasticity in various tissues, particularly in the skin, joints, and eyes.

As an oral supplement, hyaluronic acid is available in various forms, including capsules, tablets, and liquid solutions. It is typically taken orally to support overall health, skin health, joint function, and eye health. The supplement is believed to work from the inside out, providing the body with additional hyaluronic acid to complement its natural production.
