Abstracts

Oral thrush occurs when a yeast infection develops on the inside of mouth and on tongue. This condition is also known as oral candidiasis, oropharyngeal candidiasis, or, simply, thrush. The *Candida albicans* fungus causes oral thrush. A small amount of this fungus normally lives in your mouth without causing harm. However, when the fungus begins to grow uncontrollably, an infection can develop in mouth. Oral thrush most often occurs in infants and toddlers. It causes white bumps to form on the inner cheeks and tongue. These growths usually go away once treatment is received.
