## Abstracts

According to our (Global Info Research) latest study, the global ORC Industrial Waste Heat to Power market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

ORC is a closed cycle process like a conventional steam cycle process, in which waste heat is used to evaporate an organic fluid. Through an expander this drives a generator to produce clean energy. ORC captures lost profit by using low and mid temperature waste heat sources that most companies aren't aware of.

This report is a detailed and comprehensive analysis for global ORC Industrial Waste Heat to Power market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:

Global ORC Industrial Waste Heat to Power market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2018-2029

Global ORC Industrial Waste Heat to Power market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2018-2029

Global ORC Industrial Waste Heat to Power market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2018-2029

Global ORC Industrial Waste Heat to Power market shares of main players, shipments in revenue (\$ Million), sales quantity (K Units), and ASP (US\$/Unit), 2018-2023

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for ORC Industrial Waste Heat to Power

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global ORC Industrial Waste Heat to Power market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include General Electric, DUR Group, Siemens, IHI Corporation and Mitsubishi Heavy Industries, Ltd, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.

Market Segmentation

ORC Industrial Waste Heat to Power market is split by Type and by Application. For the period 2018-2029, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

High Temperature (>1,200°F)

Medium Temperature (450°F – 1,200°F)

Low Temperature (

## Contents

### 1 MARKET OVERVIEW

1.1 Product Overview and Scope of ORC Industrial Waste Heat to Power

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global ORC Industrial Waste Heat to Power Consumption Value by Type: 2018 Versus 2022 Versus 2029

1.3.2 High Temperature (>1,200°F)

1.3.3 Medium Temperature (450°F – 1,200°F)

1.3.4 Low Temperature (
