The global Organic Coated Sheet market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Organic coated plate, also known as precoated or color coated plate, is a kind of plate with a layer of organic coating or coating on both sides. The coating protects the steel plate from corrosion and weathering, while also providing an attractive finish with a wide range of colors and gloss levels. Organic coatings are usually composed of resin adhesives, pigments and other additives, which can improve the properties of the coating, such as scratch resistance, UV stability and flexibility. The coating is applied to the steel plate by various coating methods (such as roller coating, spray coating or electrostatic coating).
